

I listen to K-LOVE radio on FM translators. The idea that there is little value in national or regional services is a BAD idea. K-LOVE is a listener sponsored radio station that provides a positive and encouraging message - the message of Christian values. The fact that so many people are willing to support this type of programming should send a clear message that people want and need radio stations that are safe for all listeners. The content and message of K-LOVE should not be replaced by stations that are contrary to this message, i.e. shock jocks that promote sex, drugs, etc.

PLEASE ask God to guide your actions in this matter. Discover the love in your heart to make the right decision and keep K-LOVE on the airwave for those searching for a relationship with the Creator.
